

Power Track Enterprise

Data collection and inventory tracking system

Powersolve
Comprehensive Solutions

UNBEATABLE FLEXIBILITY WITHOUT COMPROMISE!

Asset Tracking

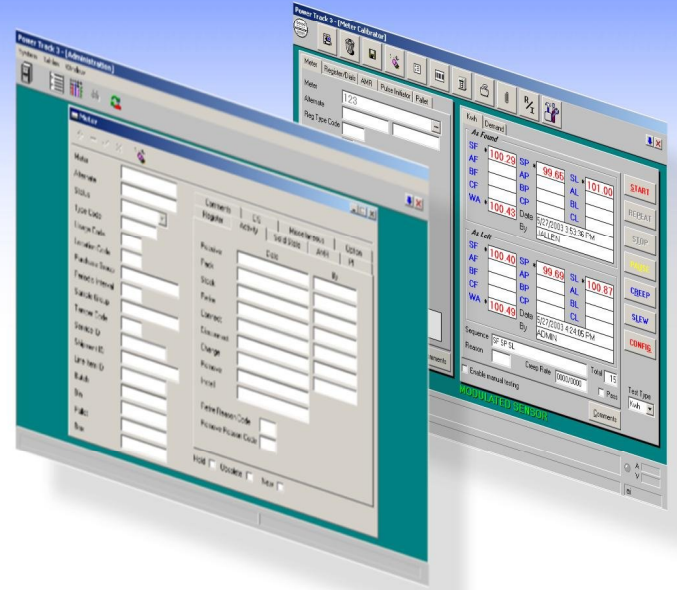

Power Track is a testing & inventory system that enables the enterprise with “cradle to grave” tracking. From the manufacturer to test acceptance to the warehouse to installation, know where your assets are at all times.

Easy System Integration and Architecture

This is an open system, using off-the-shelf software whenever possible. For instance, barcodes can be designed with BarTender® software that is available to the public. Reports can be written using Crystal Reports®, one of the most popular reporting tools on the market. Since the system is modular you can buy only the modules you need rather than pay for what you don't need. Testing meters could not be easier. Test boards become “plug and play” by using drivers. If you purchase a new type of test board, you don't have to install different software. Just load the appropriate driver! You may also add barcode scanners, barcode printers, and hand-held computers to make this a turnkey system.

Our philosophy is to empower you with options rather than lock you into a proprietary system.

To find out more about how your company can benefit from Power Track, contact our location on the back or visit us at www.powersolve.com

Features	Benefits
Collect data from any test board	Use any test board you like without reinstalling software and eliminate training on different systems
Design, print and scan barcodes	Expedite data entry while reducing errors and label inventory items to provide more information and better tracking
Ship & Receive	Know when, where, and who has handled inventory
Integrated reporting	Have data at your fingertips, be able to answer questions about quantities, location, status and more
Box & Palletize	Move inventory quicker and provide for orderly stock placement
Billing constant verification	Build confidence with customers by avoiding embarrassing overcharges and save money by avoiding undercharges
Import manufacturer data	Instantly load new purchases by importing the manufacturer supplied data file and then compare samples to the manufacturer values
Sample meters using standards such as ANSI Z1.9	Satisfy regulatory agencies and customers by adhering to a nationally recognized standard

Specifications

Operating Systems

- Windows 95
- Windows 98
- Windows CE
- Windows NT 4
- Windows 2000
- Windows XP

Bundled / Available Software

- BarTender ®
- Crystal Reports ®

Bundled / Available Modules

- Shipping
- Receiving
- Administration
- Reporting
- Testing
- Barcoding
- Sampling
- Box/Palletize
- Premise/Service Manager
- Field/District Manager
- Billing Interface
- Win5800 (RFL 5800 Owners)

Available Test Equipment Drivers

- RFL 5800 (UTEC)
- RFL 5455
- WECO
- Knopp
- AVO (Coming Soon)
- American Meter
- SNAP III Prover

Supported Databases

- Oracle ®
- Microsoft SQL Server ®
- IBM DB2 ®
- Microsoft Access ®
- Sybase ®

Accessories

- Barcode Scanners
- Barcode Printers
- Handheld Computers
- Labels
- Ribbons
- Cables
